

Welding

An entry level welder demonstrates the ability to assist lead welders in the fabrication of steel and metal structures. Students must be adept at performing basic welding functions and calculating dimensions as well as operating power equipment, grinders and other related tools. Student must be proficient in reading and interpreting basic blueprints and following work procedure specifications (WPS).

Required Courses

Basic Welding	9th
Blueprint Welding	10th
Cutting Processes	10th
Shielded Metal Arc Welding	11th
Gas Metal Arc Welding	12th
Gas Tungsten Arc Welding	12th

Every Student. Every Minute. Every Day.
