

Agriculture Animal Science

This pathway focuses on the scientific principles that underline the breeding, care, and management of agricultural animals and the production, processing, and distribution of agricultural animal products. This includes developing better, more efficient ways of producing and processing meat, poultry, eggs and dairy products, as well as studying genetics, nutrition, reproduction, growth and development of animals.

Passing the End of Pathway Assessment will give 3 college credit hours to most KY Universities. Additionally, completing the Animal Science pathway can lead to industry certification.

Required Courses
