Every Student. Every Minute. Every Day.

November 2, 2022

Dear GRC Community:

An incident occurred during school hours today, Wednesday, November, 2, that has resulted in rumors and misinformation circulating in our community and on social media. I want to take this opportunity to dispel the rumors and misinformation.

It has been brought to the attention of both school and district administration that there have been several social media messages communicating that multiple students at George Rogers Clark High School overdosed today from using a vape pen that was laced with fentanyl. There were not any fentanyl overdoses at GRC.

Shortly before the start of school, there was an incident with a vape pen, but had nothing to do with fentanyl. The parent was immediately notified and appropriate measures were taken. Had there been a cause for parent concern that involved the safety of our student body, we would have notified you immediately. I assure all of you that we are on top of the situation, and the safety of our students and staff is always our top priority.

Sincerely,

Jamie Keene
Principal
