

Agriculture Environmental Science & Natural Resources

This pathway focuses on the studies and activities relating to the natural environment and its conservation, use, and improvement. The basic principles of environmental science and natural resource management are the foundational concepts of this pathway. Subjects addressed include air, soil, water, wildlife, plants, and sources of energy. Instruction related to using these resources economically as well as recreationally is also included.

Passing the End of Pathway Assessment will give 3 college credit hours to most KY Universities.
